

ANOVA GmbH, based in Rostock, is offering software products and support under the slogan “Learning and working with digital media”. The market success of ANOVA is mainly based on the experiences with integrating creative graphics and visual computing with modern software development. In order to realize new projects, we are looking for a

software developer

Your Tasks:

- Conception and development of our learning platform
- Collaboration with different departments (e.g. Art, Game Design, Backend)
- Ensuring a high product quality, together with Quality Assurance

Requirements:

- A degree in computer science, or a comparable degree
- Very good knowledge of programming in C#
- MS Visual Studio 2013 and all the latest
- MS Team Foundation Server
- MS SQL Server incl. Stored Procedures
- MS Internet Information Services incl. ASP.NET
- HTML / CSS / JavaScript / jQuery
- Good English language skill

Create your career!

Do you enjoy challenges? Would you like to become part of a dynamic team and work as a Software Developer at our house? If so, please submit your application (Cover letter, CV), including your salary expectations and your date of availability.
